The 3 things you need to speak English well.

1-Language

If you don't have the word and phrases that you need to express the things you want to say...clearly you are not going to be able to say them.

2-Knowledge

If you have no knowledge or understanding of a given topic, you're not going to be able to talk about it well (or even at all).

3-Culture

When you say something in English, you say it with your own cultural understanding. But what I hear and understand you to be saying may be totally different, because I understand things with my own cultural values.
